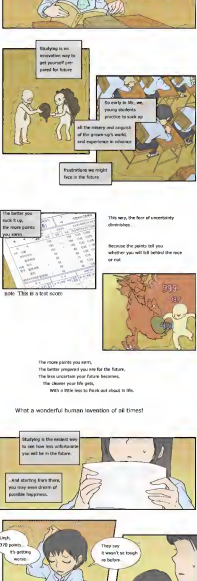
Zero Points Alliance

Normally people cheat out of desperation
No one would plan ahead to cheat in the exams, but I have...
A different idea
I'm seriously thinking "OK let's cheat as best as I can to like next year's SAT!"
And I don't intend to hit some mid-present as I want to...
The Psai scores, 500 Points

Note: The SAT they're talking about is actually the korean equivalent which the full score is 500



People live for security, trying to beat their fear and anxiety in life..
So I read in some comic books
I totally agree with that
People are actually dying for security in life.
How ironic, isn't it?
Human beings are uncertain about their future
And their fear and anxiety come from the thought
"the peaceful life I had so far may be just a lucky coincidence, and my real life could turn into misery and frustration starting tomorrow."
All of us have the same fear and anxiety, as we
human beings, including

Hmm?
study.
Studying is an innovative way to get yourself prepared for future
So early in life.. we, young students practice to suck up all the misery and anguish of this grave ugly world, and experience in advance
frustrations we might face in the future.
The better you work it up, the more points you earn.
This way, the fear of uncertainty diminishes
Because the points tell you whether you will fall behind the race or not
note: This is a test score
The more points you earn, The better prepared you are for the future, The less uncertain your future becomes, The cleaner your life gets, With a little less to think out about in life.

What a wonderful human invension of all times!

Studying is the easiest way to see how less unfortune you will be in the future
And starting from there, you may even dream of possible happiness.
Uhuh, 370 points, It's getting worse
They say it wasn't so tough as before
What have you got this time, hooray?
500.. points
Yeah yeah How wake up and see that again..
What's the score?
Eeeeeeh!
NO WAY!!

Cheez
You know I don't like any fuss about it
Ah, sorry Just too big a surprise
but your estimate wasn't a full score
My simplest estimate Wait 900. I knocked down 5 points.
Just to save I made a visit take at some thing
Note: In Korea most students check their scores right after the test with their friends
I thought if the actual score turns out to be less then estimate
it would be too embarrassing So I need to be sure.
Oh, thanks you, great son.
But still, I can only envy you
envy?
I mean, you have my respect, Your Highness
I was so humble to think that a full score only goes to those who sold their souls to the devils..
what are you talking about?
Don't spread the words
Wow

I've never imagined such a superstition even exists.
Well, of course not from some-one I know
My goal, the top three out of 500,000 people
Why not?
They will find out one way or the other!
I just don't like this to be spread.. too some sort of gossip
Note: The words hot fire took was one given by the school principal to encourage students to study harder to their score. Education in Korea is a hot zero subject.
P.S. Korea also has class ranking, school ranking, and national ranking for the student. It'd be easier to count a celebrity from have a #1 ranking friend
OK, as long as it doesn't sound like a gossip.
Eheet
What?
I think I left my wallet in the dress room
Let me get it then.
Aah, I don't believe it's on you.
How could it humble 370 points goes to ash
Your Highness the full score is only going to pay. I can't, It's a Blasphemy!
I would rather let myself right now Your Highness!
That "Your Highness" thing is no fun at all.

Mediocre, here and no exception.

Not even mediocre.

Maybe for some reason.
